

Emergency Equipment Repair Policy

Each Individual program in Industry and Transportation (Automotive, Honda PACT, Collision and Aviation) is allocated an annual budget based upon enrollments for each program. The budgets are used for the purposes of upgrading equipment, program operating expenses and maintenance of equipment as necessary.

In the event of an equipment or tool failure, monies can be used from the program operating budget to make repairs. Repairs relating to equipment specific to the programs will be charged to the program for which the equipment is utilized.

The Maintenance department handles repairs required for the facilities. Expenses for facilities maintenance, repair or upgrade are not charged to the department.

In the event that there is an equipment failure and the monies from the individual budgets have been expended, a request can be made to the CFO to have repairs or tools replaced. Almost all requests historically have been granted to ensure that the programs are able to continue to operate safely and effectively.
